- Vibrator: 95.3 x 26.2 x 92.9 mm – 117 g
- Part no: 353410

## Multifunctional clock - forwards fire alarm

TCL 410 is ideal for people with limited visual and/or hearing abilities.

It has a 3" / 7.6 cm red LED jumbo display with 3 dimming levels. Alarm functions include extra loud alarm above 95 dB – can be continuously adjusted –, 6 extra bright flash lights also effective in daylight and an external bed vibrator.

The clock detects alarm tones from a smoke detector in the immediate vicinity (3 m) and forwards the signal by acoustic/visual alarm and via the vibration pad. (This does not replace the obligation to install smoke alarms, not included with the delivery.)

TCL 410 has radio-controlled automatic time setting, automatic daylight savings conversion and switchable time display: 24 hours or 12 hours. The clock is powered by power supplies and has battery backup (for the clock only, not included with the delivery).

On the back of the device there is a USB connection for e.g. charging cell phones, and an output for the vibration pad.

## Accessories

173002 CR2032 Battery, lithium
