HDMI audio splitter with 3.5 mm/toslink

Audio splitter that converts the signal from an HDMI source to an HDMI video signal and a separate audio signal (SPDIF / 3.5 mm / ARC), or separates HDMI signal from a TV to a separate audio signal. The HDMI audio splitter supports 3D and 4K. Easy to install and completely without quality loss. Can be used with TVs that do not have 3.5 mm / toslink audio output. Note that ARC connection on your TV is required.

Use with external video signal:

Connect HDMI from the transmitting device to the HDMI IN port on the audio splitter. Then connect the ARC HDMI OUT to the ARC port on your TV. Choose 3.5 mm or toslink and connect to your sound system.

Use with assistive listening device or loop amplifier:

Connect HDMI from the ARC port on your TV to the ARC HDMI OUT on the audio splitter. Then connect the 3.5 mm or toslink output on the audio splitter to the audio input of your assistive listening device or loop amplifier.

The package includes:

- 1 x 4K HDMI Audio Extractor
- 1 x 3,5 mm to L / R audio cable
- 1 x Micro USB cable (USB power supply not included)
